

SIVARAJA KANI
Lead Java Developer

Mobile: +14373290337.
E-mail: sivarajak@gmail.com.

EXPERIENCE SUMMARY

- Having 14+ years of experience in design, development, and maintenance of enterprise applications.
- Expertise in designing and developing enterprise applications using Java, Java EE and Spring Boot.
- Having 5+ years of experience in leading & managing the team.
- Strong experience in creating Microservices architecture applications.
- Proficient in implementing SOAP and REST Web Services.
- Strong experience in Spring and Hibernate frameworks.
- Extensive knowledge in application and web servers including Tomcat, Jboss, Weblogic.
- Experienced in migrating Traditional On-Premises Applications to Cloud Infrastructure.
- Good experience in RDBMS and SQL.
- Good experience in various version control systems like Star Team, SVN, GIT.
- Experience in building APIs and applications using Mulesoft.
- Exposure to SSL implementation and setup.
- Exposure to Test Driven Development and Agile methodologies.
- Exposure to Continuous Integration and Continuous Deployment Tools.
- Strong Customer facing, Leadership, Decision making and Organization skills.
- Skilled in all phases of the software development lifecycle, proficient in translating business requirements into technical solutions and dedicated about quality, usability and scalability.
- Proven skills in troubleshooting, root cause analysis and solution identification for incidents.
- Team player, Quick learner and Good listener with strong analytical and programming skills.

PROFESSIONAL EXPERIENCE

- Working as Senior Associate in Publicis Sapient, Toronto, Canada from 18th Oct 2021 [1.6 years] in Java/J2EE domain.
- Worked as Lead Software Engineer/Technical Manager in Bally Technologies, Mississauga, Canada from 2nd Aug 2016 to 15th Oct 2021 [5.2 years] in JAVA/J2EE domain.
- Worked as Lead Software Engineer in Bally Technologies, Bangalore, India from 31st Aug 2012 to 28th July 2016 [3.9 years] in JAVA/J2EE domain.
- Have completed VIRTUSA Launch Pad Training and worked as Senior Software Engineer in VIRTUSA, Chennai, India from 6th Oct 2008 to 24th Aug 2012 [3.9 years] in JAVA/J2EE domain.

TECHNICAL SKILLS

JAVA/J2EE	AWS, OpenShift
Spring Boot	SonarQube, TeamCity, Udeploy
Mule, Hibernate, jBPM, Drools	Tomcat, Jboss & Weblogic Server
SOAP & REST	Maven, GIT, Jenkins, Docker
MQ, Redis, EhCache, Hystrix	Cucumber, JMeter, JIRA, QC
SQL(MSSQL & Oracle) & NOSQL(MongoDB)	Unix Basics

CERTIFICATIONS

AWS Certified Solutions Architect Associate.

EDUCATION

B.Tech. Information Technology (2008 Batch), Anna University, Chennai, India.

ROLES AND RESPONSIBILITIES

Publicis Sapient (Oct 2021 – Till date)

- Working as a Consultant for Citi Bank and involving in rewrite of existing Corporate Action Interactive Noticeboard (CAIN) Application.
- Designed and developed various Microservices & Jobs using Spring Boot.
- Using various tools and technologies like Jenkins, Sonar Qube, Black Duck, TeamCity, UDeploy, OpenShift.
- Have written DDL and DML scripts for the CAIN applications.
- Worked to improve code quality by using different development standards such as Unit testing, TDD, Code Coverage, Vulnerability Scans, Continuous Integration and Code Reviews.
- Deployed and monitored CAIN application in various environments like SIT, UAT.

Bally Technologies (Aug 2012 – Oct 2021)

- Involved in analysis of technical information to design, develop and modify the Bally's Casino Management Systems like Unified Wallet Service, Slot Data Management System, Centcom, Alert Grid, User Matrix, Asset Matrix & Attavanai.
- Lead a team of eight developers and focused on mentoring and up skilling their talent by constantly monitoring and assessing them.
- Created the technical and low-level design documents for various applications/enhancements.
- Designed and developed various applications with Microservices Architecture using Spring Boot.
- Used various technologies like RabbitMQ, Redis, OAuth, JWT, Aspects.
- Setup and deployment of Bally Products in AWS Cloud Environment.
- Implemented RESTful and SOAP web services for communicating information between systems.
- Implemented SSL based services for various applications.
- Have written DDL and DML scripts for the various applications.
- Worked to improve code quality by using different development standards such as Unit testing, TDD, Code Coverage, Continuous Integration and Code Reviews.
- Installation, Configuration of Jboss Application Server and Testing Support for Bally Products in various customer environment.
- Involved in Jboss to Wildfly Migration.
- Troubleshoot and resolved production incidents through effective root cause analysis, solution identification, incidents managements to closure and consistent follow-ups.

Virtusa (Oct 2008 – Aug 2012)

- Involved in various development projects like Enhanced Service Model, Manage Incident, Getafix, Auto Deployment Tool, Logical Interface for Ordering Network Services(LION).
- Developed Enhanced Service Model application for JPMC to automate manual processes on Transfer of Death, Money Transfer, Duplicate Statement, Mutual Fund Disclosure and other use cases using Spring Web Service and Hibernate.
- Developed the custom interceptors for web service security and access control.
- Built the core orchestration engine for Manage Incident application using Mule, Spring, Hibernate, EhCache, jBPM & Drools for British Telecom.
- Used the Continuous Integration technologies (Jenkins) to automate the build, unit testing, code coverage and regression testing.
- Deployed the applications in Weblogic server hosted in various UNIX environments (CIT, E2E, PRELIVE, LIVE, DR).
- Represented the Team in various calls including Defect call, Deployment call etc.
- Involved in Performance Testing of the application using JMeter and fine-tuned the code.
- Attended daily stand-up to discuss about the progress of the assigned tasks. Also participated in Sprint planning, Sprint review meeting and Sprint retrospective meeting.
- Troubleshoot and resolved production incidents through effective root cause analysis, solution identification, incidents managements to closure and consistent follow-ups.
- Trained the team members in various technologies like Spring framework, JiBX, Mulesoft.
